

Structural Rolling

Haltom Industries standard and custom angle rings are widely used in commercial HVAC, dust & fume control systems and other industrial applications across the Continental U.S. and Canada. With over 30 years of experience providing our standard and custom-rolled products, we offer superior quality at a competitive price.

Structural Rolling

Rolled to your desired specifications. See below illustrations for examples of our capabilities in all material types and alloys. What sets us apart from others in the industry is our capability of further processing materials: trim, weld, punch, and coating.

ANGLES

LEG OUT

Specify inside diameter and if unequal, which leg is out.

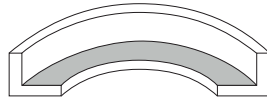

HEEL OUT

Specify inside diameter.

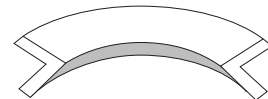

LEG IN

Specify outside diameter and if unequal, which leg is in.

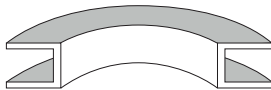

HEEL IN

Specify outside diameter.

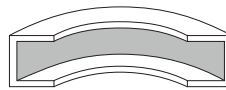

CHANNELS

LEGS OUT
